DETAILED ACTION

Claims 1-19 are currently presented and have been examined.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 24

July 2007 was filed after the mailing date of the non-final

rejection on 7 May 2007. The submission is in compliance with

the provisions of 37 CFR 1.97. Accordingly, the information

disclosure statement is being considered by the examiner.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Application/Control Number: 10/687,637

Art Unit: 2143

Claims 1-19 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 7,167,902 to Tabuchi et al. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-19 recite a first, second, third, and fourth storage systems wherein the first and second storage systems equate to the "plurality of first storage systems" of claims 1-4 of U.S. Patent No. 7,167,902, the third storage system equates to the "first gateway storage system", and the fourth storage system equates to the "second gateway storage system", wherein the first and second data storage systems or "plurality of first storage systems" include a controller controlling a write request received from at least one host computer which equates to wherein the "plurality of first storage systems" "...comprises a storage and a controller which controls said storage to store data therein" "wherein each first storage system...upon receipt of said data write request issued by said first host computer, controls by said controller", the third storage system or "first gateway storage system" containing a controller that controls data received from the first and second storage systems synchronously which equates to "said first gateway storage

Art Unit: 2143

system comprises an interface control unit for conducting data transfer to a from the first storage systems...and a controller for controlling the storing of data...said first storage system to perform a synchronous remote copy function...and issuing said data write request to said interface control unit of said first gateway storage system...", and the fourth storage system or "second gateway storage system" including a controller that controls data received from the third storage system asynchronously which equates to "said first gateway storage system to perform an asynchronous remote copy function...said second gateway storage system comprises an interface control unit for conducting data transfer...to and from said first gateway storage system...and a controller for controlling the storing of data in the storage...said second gateway storage system...upon receipt, by the interface control unit, of said data write request issued by said first gateway storage system..."

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2143

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George C. Neurauter, Jr. whose telephone number is 571-272-3918. The examiner can normally be reached on Monday-Friday 9am-5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wiley, can be reached on 571-272-3923. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
